

# A WEEK WITH TIMUR!

*meet*

## Timur Gareyev

Many wonder what star system he really came from.

Today a licensed sky diver and base jumper, falling to Earth is still one of his great pleasures in life.

Humans at the Rissman Memory Lab at UCLA are studying his brain... because on December 4, 2016 under controlled supervision, Timur Gareyev played chess against 48 strong opponents – all at once – while blindfolded – and 18.5 hours later his victorious score had set a new world record.

*“There are ways to stimulate the intellect and get better at chess beyond simple chess drills and practice.”*

GM Timur Gareyev

GRAND OPENING

## Club Chess!!

COLORADO SPRINGS, CO

*Well of course we don't actually have a medieval European fortress, yet. They are hard to come by here in the heart of the new world.*

*But imagine your very own relaxing, safe, private building dedicated to all things chess, for anyone and everyone who has ever been even slightly intrigued by this most ancient and fascinating of games, young and old. Just imagine the whole family going out to enjoy unique virtual chess settings for casual play in London, Nashville, Paris... how about a friendly skirmish on a Florida beach in real sand with a cool lemonade?!*

*Whether your interest lies in top-notch training and competitive sportsmanship – or good old fashion casual play for the sheer fun and excitement of it – or perhaps you're just being moved by that inner desire to finally learn the “Game of Kings” – or maybe you simply enjoy meeting and being with fun, interesting people – whatever made you pick up this brochure, Club Chess!! was built especially for you.*
